

EEICT 2008

Obsah

Předmluva

Doktorské projekty

Zpracování signálů a obrazu

Čížek, M.

Nonlinear Ultrasound Propagation Modeling

Čmiel, V.

Data Processing Software for Innova 1312 Gas Monitor

Harabiš, V.

Automatic Landmarks Detection for Retinal Image Registration

Havlíček, M.

Detection of Functional Brain Connectivity by Independent Component Analysis ...

Hradiš, M.

Shot Boundary Detection with Simple Boosted Classifiers

Juránek, R.

Engine for Real-Time 2D Object Detection

Mikulka, J.

Partial Differential Equations in Image Processing

Rychtárik, M.

Comparison of the Karhunen-Loeve Transformation Results with the Results of the Modified Spectral Method in Time Domain

Vítek, M.

Detection of QRS Boundaries and T Wave End in Multilead ECG Signals

Teoretická elektrotechnika, fyzika a matematika

Andreev, A.

CdTe Radiation Detectors Relaxation Time

Chvátal, M.

Noise Reliability Indicators in Smt Chip Resistors

Kadlec, R.

New Trends in the Numerical Modeling of Lighting Systems

Palai-Dany, T., Raška, M.

The Combined Dielectric Spectroscopy Investigation in a Wider Frequency Range .

Paračka, P.

Measuring of Microplasma Noise and Noise Cur-Rent vs. Reverse Voltage Dependence

Škarvada, P.

Solar Cell Surface Local Reflection and PN Junction Area Measurement

Tofel, P.

Non-Destructive Testing by Electro-Ultrasonic Spectroscopy with DC Electric Signal

Mikroelektronika a technologie

Abraham, P.

Use of Modified Conductometric Method for Measurement of Resistance of Collector Corrosion Layer

Benayad, I.

Study of State-Machine by Designing a Code Entry System

Běťák, P.

SCR I-V Characteristics Tuning for Applications of ESD Protections

Dvořák, P.

Polyaniline in Supercapacitors

Eldbib, I.

Low Voltage Current Conveyor Techniques

Eldbib, I.

Low Voltage Doccii-Based Biquad Filter

Jirák, T.

Electrode materials based on lithium-titanate-oxide

Knotek, T.

Galvanic Deposition of Metals with Electrocatalytic Properties

Macků, R.

Diagnostics of Solar Cells in Spectral Domain

Makovička, J.

Natural Graphite as Anode for Lithium-ion Batteries

Sharoun, A.

Voice Over IP and Network Convergence

Stejskal, P.

The Impact of Intermetallic Compounds on Reliability of Solder Joint

Špičák, P., Svoboda, V.

Nickel Hydroxide Electrode Studied by EQCM

Vognar, J., Novák, V., Vondrák, J., Sedlaříková, M.

Influence of Different pH Medium in AFC Positive Electrode Preparation

Vrbický, J.

Aluminium and Manganese Substituted Nickel Hydroxide

Informační systémy

Dosedla, M.

Adaptive Process Management Overview

Goldefus, F.

Left-Forbidden Cooperating Distributed Grammar Systems

Jaša, P.	Predicting Deleterious Single Nucleotide Po-Lymorphisms
Krajíček, J.	A Note on Application of Natural Phenomena in Computer Science
Kunc, M.	Visualization of Document Elements Classification
Rychnovský, L.	Start String in Formal Language Theory
Sedláčková, J.	Using CSP in Description of Processes
Zuzáňák, J.	Rapid Prototyping Parser Generator

Grafika a multimédia

Hošek, J.	Evaluation of Watermarking Parameters Effect on Watermarked Video Quality
Kockmann, M.	Syllable Based Prosodic Features for Speaker Identification
Kopecký, J.	The Recognition of Czech Lectures by LVCSR System
Mikolov, T.	Language Models for Automatic Speech Recognition of Czech Lectures
Podpora, M.	Biologically Reasoned Machine Vision: RLE vs. Entropy-coding Compression of DWT-transformed images

Počítačové systémy

Caha, L.	Database for Registration of DNS and DHCP Records
Straka, M.	Checkers Design for Communication Protocols Based on FPGAs

Intelligentní systémy

Plchot, O.	Automatic QoS System in Linux
-------------------	-------------------------------------
